SPECIAL ISSUE REQUIREMENTS
FOR AUTHORS

Computers and Mathematics with Applications
Mathematical and Computer Modelling

In order to continue the publication of professional quality journals, the items listed below are the minimum requirements for accepting manuscripts for Special Issues submitted for publication in *Computers and Mathematics with Applications* and *Mathematical and Computer Modelling*. We ask you to be sure that your manuscript meets these requirements when it is submitted to us for typesetting. We will be unable to typeset/format your manuscript until these requirements are met. We suggest that you use the following as a checklist before forwarding the issue to us.

Number of manuscripts allowed per Special Issue: Authors should not appear as co-authors for more than 2 (two) manuscripts (excluding Preface and Dedication).

Addresses: Please make sure your manuscript has <u>current</u> and <u>complete</u> addresses for all authors and co-authors. Include email and FAX numbers, if available, as these are very helpful in any correspondence with the authors. Also, please keep us updated on any address changes.

Electronic Versions: TEX, AMS- TEX, LaTEX, or Word files for the text of the manuscript are acceptable. The digital file must match the hard copies exactly. If any discrepancies are detected you will be asked to supply matching digital version and hard copy. This will cause a delay in the publication of this special issue.

Abstracts: Check to make sure all manuscripts begin with an abstract.

Keywords: Five keywords should be provided for your manuscript.

Figures & Graphs: Authors must supply figures and graphs in an electronic format in addition to hard copies which are original, publication quality, xerographically reducible and reproducible, approximately twice the publication size, with labelling that is clear and sufficiently open to permit the reduction of size. Each figure or graph should be provided on a separate page, and approximate location in the text should be indicated. Figure captions or legends, should be provided for all illustrations on a separate page. Photographs should be sent as glossy prints.

The preferred format for figures and graphs is encapsulated PostScript (eps). From with the TEX file of each paper, we import the eps figures. For the fastest publication time, the format should be eps. However, we also request that authors submit the original file of each figure and information regarding the software used to create it. We will try to work with any electronic format that we receive. However, this may cause a delay, and at our discretion, we may require authors to re-submit the illustrations in eps format, compatible with Adobe Illustrator. Each figure or graph should be a separate file.

References: References should be numbered sequentially <u>in the order of their appearance in the text</u>, not alphabetically. References should be cited in the text in square brackets. If the references in your manuscript are not in this format, you will be asked to redo them, causing a publication delay for the entire special issue.

Copies: Please send **<u>2 SINGLE-SIDED COPIES</u>** of your manuscript.

Meeting these minimum standards will ensure better quality and faster publication of the Special Issue. We appreciate your cooperation.

E.Y. Rodin
Editor-In-Chief
